Comprehensive Planning

Comprehensive plans...

Define a community's values, goals, and vision for the future

Provide a basis for policies, regulations, and development decisions

Determine how land is used

Are required by Wisconsin Comprehensive Planning Law (s. 66.1001)

Common challenges

State requirements without state funding

Staff + budget limitations

Balancing requirements with practicality

Issues transcend municipal boundaries

How CARPC can help

Customization: recognize constraints and tailor approach accordingly

Capacity: leverage data, tools, and expertise

Coordination: manage joint planning processes

Comprehensive Planning

INTRODUCTION

Wisconsin "Smart Growth Law" and Village of Mazomanie Comprehensive Plan

The Wisconsin Legislature enacted a comprehensive planning law in 1999, set forth in Section 66.1001 of the Wisconsin Statutes. The requirements supplement earlier provisions in the Statutes for the preparation of county development plans (Section 59.69(3)) and local master plans (Section 62.23), and provide a framework for developing, adopting, implementing, updating, and amending comprehensive plans in Wisconsin. The law includes a "consistency" requirement, whereby zoning, subdivision, and official mapping ordinances adopted and enforced by counties, cities, villages, and towns must be consistent with the comprehensive plan adopted by the county or local unit of government.

In 2007, the Villages of Mazomanie and Black Earth and the Town of Black Earth received a multi-jurisdictional grant from the Wisconsin Department of Administration (DOA) to address the state comprehensive planning requirements. As a result, each local government partner adopted comprehensive plans to satisfy the statutes. The Village of Mazomanie's original comprehensive plan is documented in the first edition of this report, *Village of Mazomanie, Wisconsin, Comprehensive Plan: 2009 – 2028*, which was adopted by the Village Board on October 27, 2009. The first edition of the Village's comprehensive plan is documented in an extensive report that features a wide range of data and mapping and addresses the nine comprehensive planning elements and corresponding goals, objectives, policies, and programs required by the comprehensive planning law.

A comprehensive plan is intended to provide a rational basis for making local land use decisions and to serve as a blueprint for communitywide effort to achieve its vision. Village officials and staff use the comprehensive plan as a basis for coordinated decision-making on planning, zoning, platting, development, infrastructure, and budgeting issues. Others who may find the comprehensive plan useful include residents, property owners, business owners, community groups, and other units of government, such as the Wisconsin Heights School District. Each of these individuals and groups may have different interests in the plan—engaged with understanding and reading of particular elements.

The law requires that the comprehensive plan be updated no less than once every 10 years but does not specify what the update must include or how extensive the update must be. This update reflects changes

"A comprehensive plan is intended to provide a rational basis for making local land use decisions and to serve as a blueprint for communitywide effort to achieve its vision."

NINE ELEMENTS OF A COMPREHENSIVE PLAN

Issues and Opportunities	Transportation	Intergovernmental Cooperation
Agricultural, Natural, and Cultural Resources	Utilities and Community Facilities	Land Use
Housing	Economic Development	Implementation

in current conditions and to the community's vision for long-term growth since the first edition. It focuses on updating the land use map, which is a visual representation of the comprehensive plan and serves to support its stated goals, objectives, and policies that also are updated here as needed. It updates other elements of the first edition directly relevant to updating the land use maps.

Community Participation in the 2020 Comprehensive Plan Update Process

The Wisconsin comprehensive planning law does not mandate how a local community should grow, but it requires public participation at the local level in deciding a vision for the community's future. The uniqueness of individual comprehensive plans reflects community-specific and locally driven planning processes.

The Village Board, the Plan Commission, and Village staff oversaw the process to update the comprehensive plan. Restrictions on in-person public meetings imposed by state and county officials in response to the COVID-19 pandemic curtailed opportunities for direct community participation in the update process, which included the following major public engagement steps:

1. Village Board adopts Comprehensive Plan Update Public Participation Resolution (Appendix B) – January 2020
2. Village resident and property owner feedback gathered via public survey (Appendix B) January – April 2020
3. Community Visioning Meeting at Wisconsin Heights High School – February 2020

Chapter 1: Overview of 2021 Update

Comprehensive plans typically have a life span of 10 to 20 years, with minor updates and amendments completed at regular intervals. This plan is an update of the 2005 Master Plan prepared with the assistance of Capital Area Regional Planning Commission staff.

The Village of Rockdale began updating its *Comprehensive Master Plan* in the summer of 2020 with assistance from the Capital Area Regional Planning Commission. The main goals of this update process were to bring the plan into compliance with state comprehensive planning requirements and to provide updated goals, recommendations, data, and other information as a basis for Village decisions. This section outlines the update process, along with key changes that have occurred since 2005 and progress made on the plan's original recommendations.

2020-2021 Update Process

The Village's 2020-2021 update process included five meetings of the Village of Rockdale Plan Commission. The Plan Commission began by reviewing the existing plan's goals, objectives, policies, and recommendations and revising them to reflect current conditions, priorities, and progress made since 2005. The public participation plan was also updated early in the process; the updated participation plan was approved with revisions following the August Plan Commission meeting and shared on the Village's website.

To update the plan's text and tables, CARPC staff collected current data from the US Census Bureau and other sources and researched relevant plan, program, and policy updates. Related plans reviewed for the update include the Village of Cambridge and Town of Christiana comprehensive plans, the CamRock County Park Master Plan (2008), and the 2018-2023 Dane County Parks and Open Space Plan. The plan's appendices were reviewed and revised with updated information on growth management tools and Dane County's environmental corridor system; a new appendix containing the Village's 2008 Urban Service Area amendment was also added. Updated maps were created to display current information on the Village's boundaries, facilities, infrastructure, resources, and land use.

A draft plan with updated data, text, and maps was shared for a 30-day public comment period from December XX to January XX. A public hearing was held on January XX. The Village Board passed a resolution to adopt the updated plan on February XX, 2021.

Key Changes since 2005

Many of the goals, objectives, and recommendations of Rockdale's 2005 *Comprehensive Master Plan* were formulated with the expectation that the Village would soon be experiencing significant population growth. This anticipated growth was not ultimately realized, resulting in less funding than expected for some proposed projects. Recent population trends have shown slower, more steady growth than observed at the county level, indicating that Rockdale can expect to maintain a relatively

stable population over the next several years. The plan's goals, objectives, and recommendations have been updated to reflect current conditions and expectations.

Major local developments since 2005 include the purchase of the historic mill site by Dane County in 2003, finalizing the parkland connection between Cambridge and Rockdale. The mill and its associated outbuildings were subsequently deconstructed. In 2008, an upgraded Rockdale Wastewater Treatment Plant was installed. The new plant replaced the original 1971 facility and has the capacity to serve approximately 300 persons. The Village's Urban Service Area boundary was also amended in 2008. The amendment added 36.6 acres of developable land to the service area, removed 21.7 developable acres, and designated 0.9 acres of parkland within the existing USA as environmental corridor. This amendment also changed designation of the service area from Urban Service Area to Limited Service Area as the Village did not intend to provide municipal water service within the 20-year planning period.

Plan Recommendation Status

General Recommendations

2005 Recommendations	2020 Status
1. Adopt and implement the Comprehensive Plan, under the auspices of SS 62.23 Wis. Statutes.	In progress.
2. When possible, enter into intergovernmental agreements with neighboring municipalities to foster implementation of the Comprehensive Master Plan.	Ongoing.
3. Amend the Comprehensive Master Plan as necessary to comply with Wisconsin's Comprehensive Planning (Smart Growth) Law.	Ongoing.
4. Adopt a comprehensive plan for the Village of Rockdale by January 1, 2010 that complies in full with Wisconsin's Comprehensive Planning Law (SS. 66.0295).	Revised. Adopt an updated comprehensive plan for the Village of Rockdale that is fully compliant with Wisconsin's Comprehensive Planning Law (§66.0295 Wis. Stats.) in 2021.

Housing Recommendations

2005 Recommendations	2020 Status
1. Single-family detached units should make up about 90% of new housing in the Village.	Revised. New housing in the Village should consist primarily of single-family detached units. Multifamily units, as described below, will be evaluated on a case-by-case basis.

Future Urban Development Area Planning

Goals

Protect natural resources

Promote efficient development

Preserve farmland

Process

Neighboring communities consider future development scenarios

Joint steering committee + joint staff team

Optional public involvement

Outcomes

Reports + maps to guide:

- Future land use planning
- Local comprehensive planning (Middleton, DeForest, Westport)
- Development review processes (DeForest)

03

Water Resources Planning

Water resources planning

Preserve the recreational, economic, and ecological value of water resources

Restore impaired water resources

Mitigate flooding and increase flood resiliency

Prioritize actions to make the best use of limited resources

Common challenges

Water resources, stormwater runoff, and pollutants cross municipal boundaries

Local staffing + funding limitations

Balancing the interests of different stakeholders

How CARPC can help

Convener: bringing people together to address an issue, problem, or opportunity

Capacity: data, tools, and expertise

Funding: leverage our staff time to bring in state and federal grants

THE GOOD, THE BAD, & THE UNCERTAIN: HOUSING UNIT DATA FOR 2019

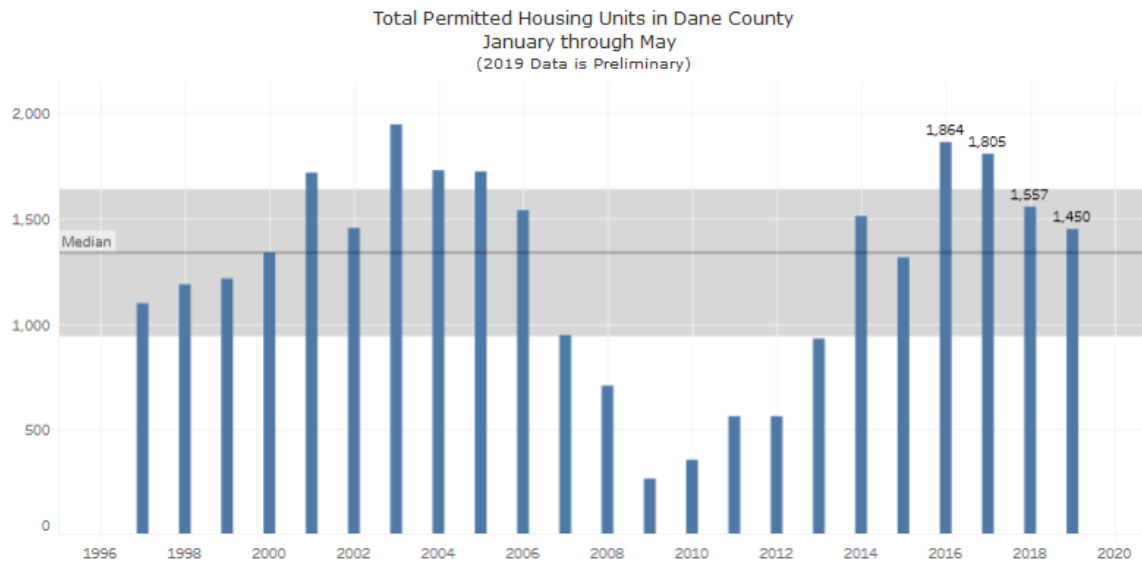

< ● ● ● ● ● ● ● ● ● ● >

An Average Start Over the Long-term, Downward Trend Over the Short-term

Final 2018 State of the Cities Data Systems (SOCDS) permitted housing unit counts from the U.S. Department of Housing and Urban Development (HUD) are in and the preliminary counts are rolling in for 2019.

January through May construction in 2019 was just above the long-term average, with a total of 1,450 units produced in Dane County.

However housing unit production is down compared to recent history which ranged from 1,557 to 1,864 total housing units by this point in the year. This may not necessarily be cause for concern, construction timelines for large project can dictate which months see spikes in new units.

Special Studies

Special Studies: Bike + Pedestrian

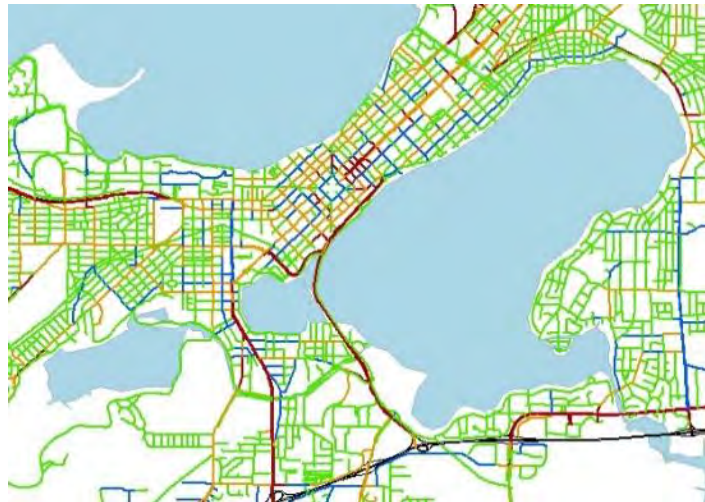

Bike/Pedestrian Safety

Dane County Bicycle and Pedestrian Crash Study

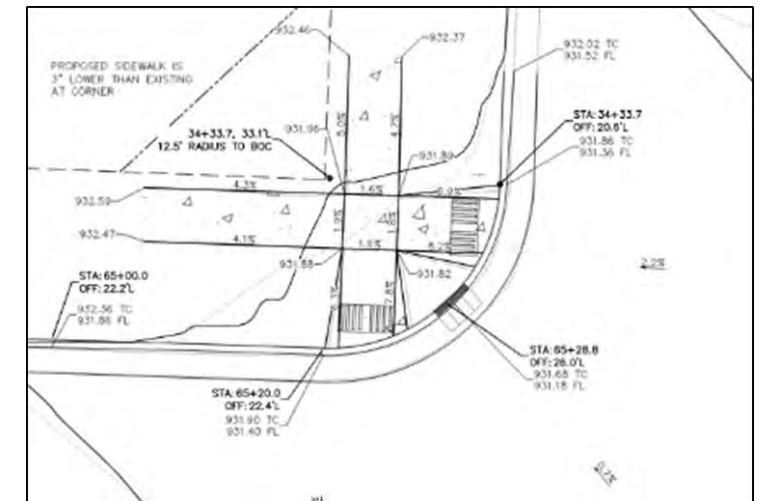

Level of Traffic Stress

Level of Traffic Stress (LTS) Analysis and Low-Stress Route Finder tool

Facility Requirements

Local Pedestrian & Bicycle Related Infrastructure Requirements

Dane County Bicycle and Pedestrian Crash Study (2018)

Analyzed all bike and pedestrian crashes in Dane County that occurred in 2011-2015

- Classified crashes according to two crash type classification schemes
- Identified the most common bike and pedestrian crash locations, crash types, and key risk factors

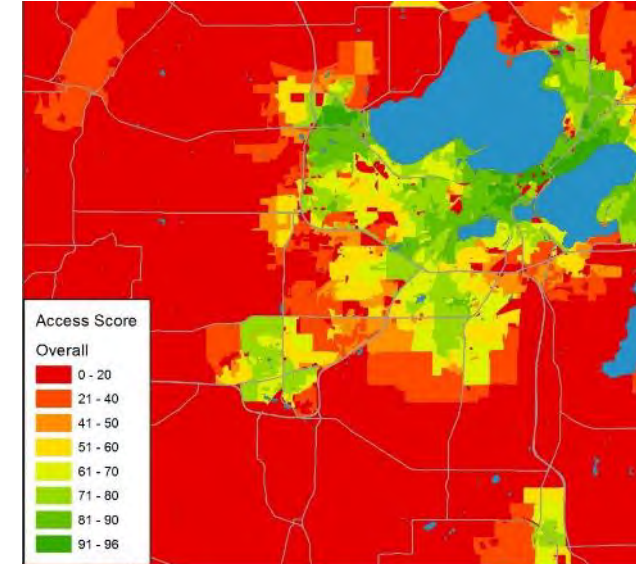

* There were about 3.5x more crashes involving bicycles traveling against traffic (on sidewalks and side paths) than traveling with traffic.

Level of Traffic Stress (LTS) Analysis and Low-Stress Route Finder Tool (2018)

Classified all streets and paths on a scale of 1 to 4 according to the level the level of traffic-related stress experienced by cyclists. LTS ratings have been used to:

- Inform planning decisions
- Identify appropriate construction detours
- Help the public select low-stress biking routes
- Quantify disparities in bicycle accessibility

Low-Stress Destination Accessibility

Local Pedestrian & Bicycle Related Infrastructure Requirements (2020)

Researched all Cities and Villages in MPO Planning Area:

Street Requirements

- Block Length & Street Network Connectivity
- Street Width
- Curb Radius
- Radius of Curvature

Sidewalk & Path Requirements

- Width Requirements
- When/Where Required

Sidewalk Snow Removal Ordinance

Pedestrian Access and Circulation Standards

Intersection Safety Network Screening

Crash Frequency

- The number of crashes at a given intersection

Crash Rate

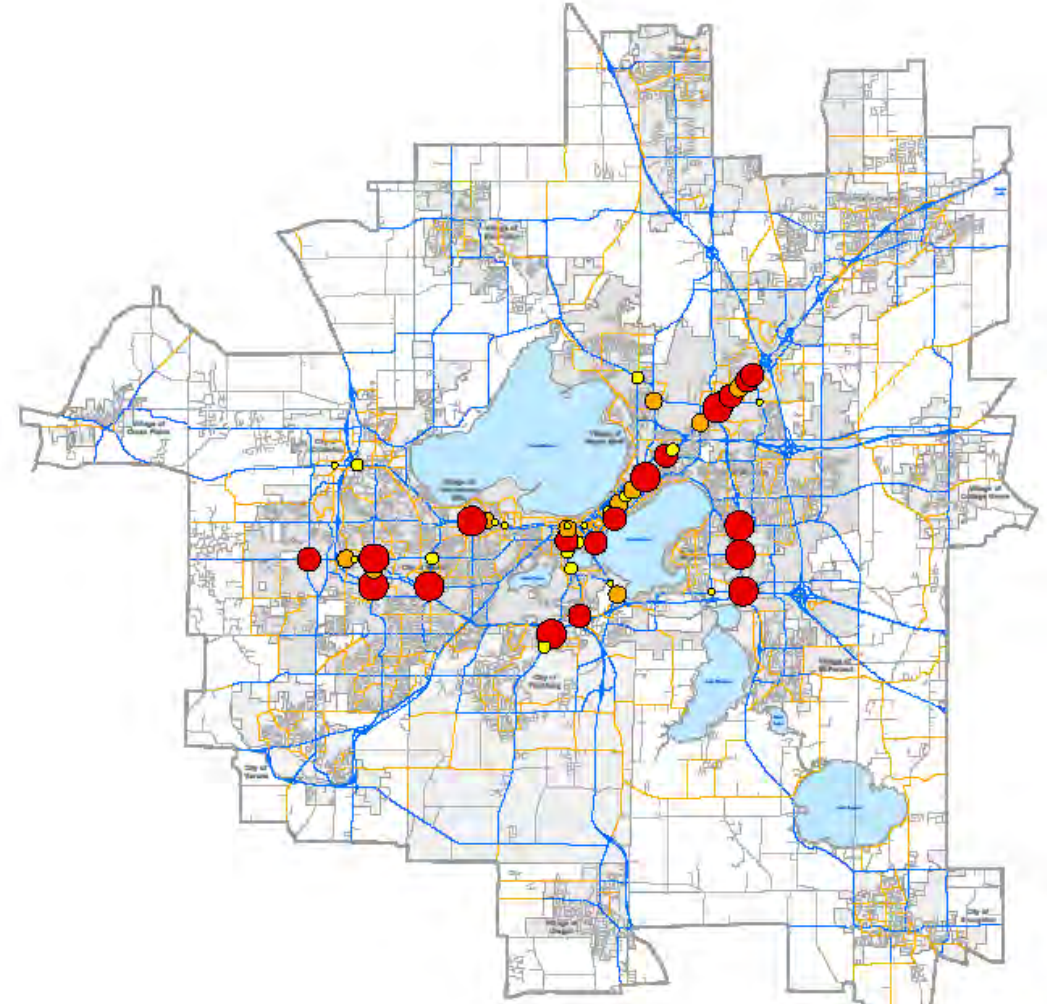

- Total number of crashes per million vehicles entering (MEV) a given intersection

Crash Severity Index

- The relative severity of crashes at a given intersection

Level of Safety Service (LOSS)

- The relation between the modelled expected crash frequency and severity compared to the actual crash history of the intersection

04

GREATER MADISON mpo
CONNECTING PEOPLE, PLACES & OPPORTUNITIES

You may have noticed that our name, logo, and web address have changed. As the newly minted Greater Madison MPO (formerly Madison Area Transportation Planning Board), we are excited to begin celebrating the results of our recent rebranding.

In addition to creating a fresh, accessible new name and logo, we used the rebranding process to dig deep and define a forward-thinking mission and vision for our work in the region. We also worked with the [Capital Area Regional Planning Commission](#), our sister agency focused on regional land use, to improve future public recognition by coordinating our brands.

We learned a lot and we are grateful to everyone who assisted us in this journey. In the coming weeks and months, we look forward to sharing how we are bringing our new identity to life.

TDM & Rideshare Etc.

Overview

Rideshare Etc. is a **transportation demand management (TDM)** program of the MPO.

The program's mission is to connect individuals, businesses, and organizations in the Madison region with convenient alternatives to driving alone.

The program uses **information, encouragement, and incentives** to promote behavior change.

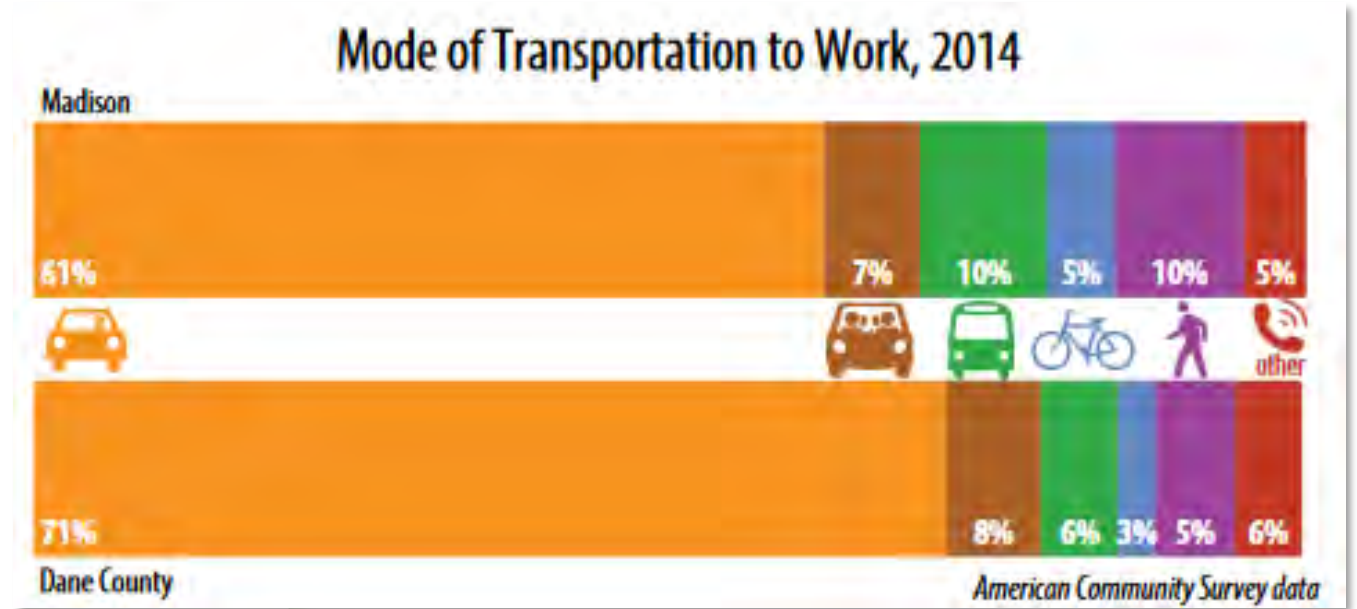

Why TDM?

TDM encourages & supports **alternatives to driving alone**, to help meet goals for environmental sustainability, economic development, equity, and quality of life in our region.

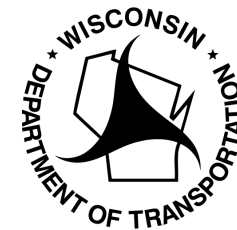

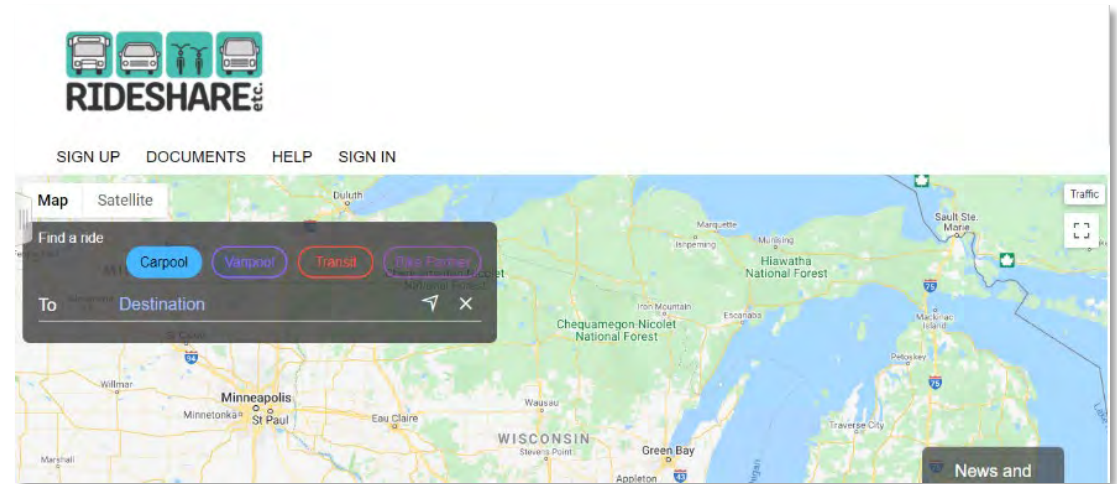

TDM supports regional goals to reduce vehicle miles traveled (VMT):

- Reduce VMT per capita – MPO Regional Transportation Plan 2050
- Reduce total VMT 15% by 2050 – 2020 Dane County Climate Action Plan

Primary Program Activities

- › Administer Rideshare Etc. online, the Guaranteed Ride Home program, and Dane County employee bus passes
- › Assist individuals, employers, property managers, and local governments
- › Coordinate with partners

Individual Assistance

www.RideshareEtc.org

Provides connections to carpool partners, state vanpools, park-n-rides, Metro routes, and bike buddies.

- 4,507 total registrants
- 308 bike match registrants
- 1,021 searches run in 2020

Guaranteed Ride Home Program

- › Provides an emergency ride for commuters who bus, bike, or rideshare.
- › Participants receive up to six taxi vouchers per year, worth \$75 each.
- › 1,442 commuters registered

›› I wanted to thank you for helping provide this program. This is an amazing benefit and gives me peace of mind getting to and from work!

Organizational Assistance

Employers, Property Managers, Agencies

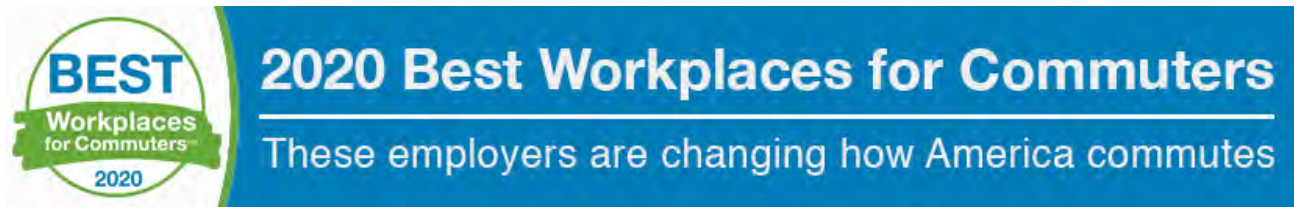

Commute Solutions Program assistance

- Assessment, planning, communications

Outreach, communications & incentives

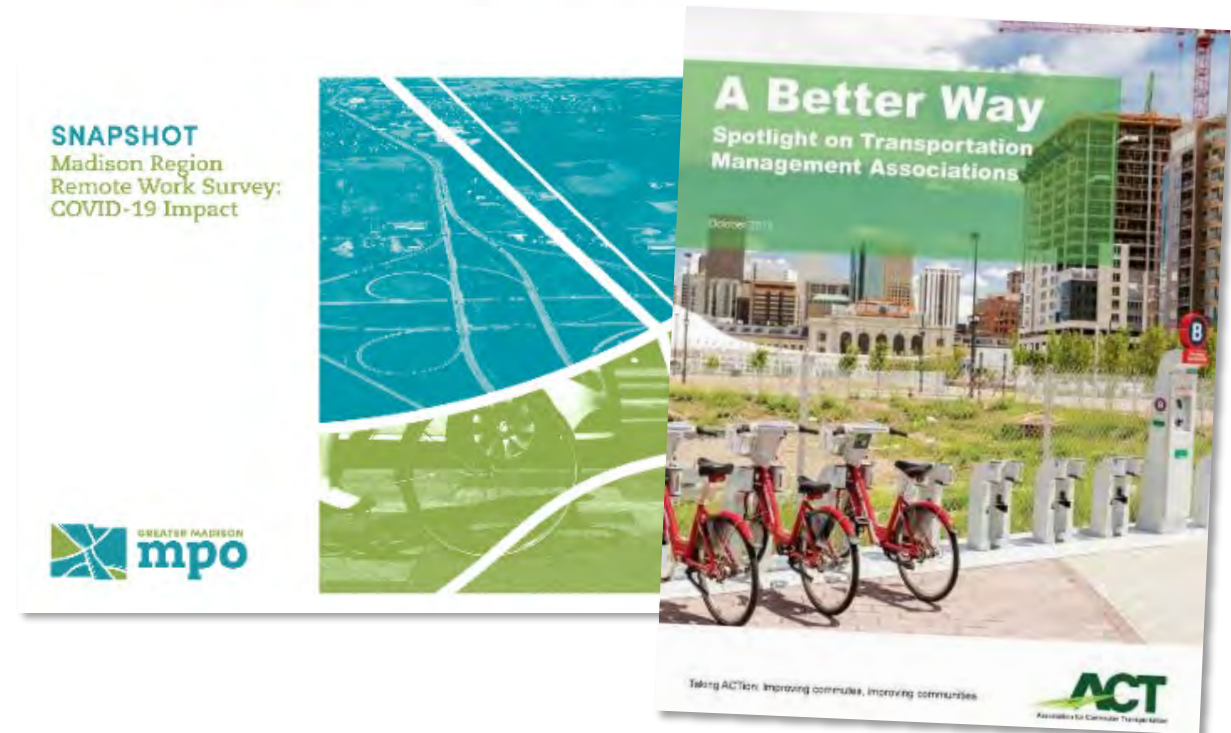

- E-newsletter for employer contacts
- Marketing materials for GRH & Rideshare
- Attendance at brown bags, fairs, etc.
- Free regional bicycle challenges

Assistance with TDM plan review

What's Next in 2021

- › New brand & website rollout - **RoundTrip**
- › Improvements to online platform, GRH voucher delivery, digital resources
- › Regional Bike Challenge in May
 - › www.LoveToRide.net/Madison
- › Regional remote work survey #2 & support for Sustain Dane telework assistance scoping project
- › Strengthen employer connections
- › Continue to support City of Madison TDM program development
